A Wonderful Record.

As made up by improved and exact processes Dr. Pierce's Favorite Prescription is a most efficient remedy for regulating all the womanly functions, correcting displacements, as prolapsus, anteversion and retroversion, overcoming painful periods, toning up the nerves and bringing about a perfect state of health. It cures the backache, periodical headaches, the dragging-down distress in the pelvic region, the pain and tenderness over lower abdominal region, dries up the pelvic catarrhal drain, so disagreeable and weakening, and overcomes every form of weakness incident to the organs distinctly feminine.

"Favorite Prescription" is the only medicine for women, the makers of which are not afraid to print their formula on the bottle wrapper, thus taking their patrons into their full confidence. It is the only medicine for women, every ingredient of which has the strongest possible endorsement of the most eminent medical practitioners and writers of our day, recommending it for the diseases for which "Favorite Prescription" is used. It is the only put-up medicine for women, sold through druggists, which does not contain a large percentage of alcohol, so harmful in the long run, especially to delicate women. It has more genuine cures to its credit than all other medicines for women combined, having saved thousands of sufferers from the operating table and the surgeon's knife. It has restored delicate, weak women to strong and vigorous health and virility, making motherhood possible, where there was barrenness before, thereby brightening and making happy many thousands of homes by the advent of little ones to strengthen the marital bonds and add sunshine where gloom and despondency had reigned before.

Write to Dr. R. V. Pierce. He will send you good, fatherly, professional advice, in a plain, sealed envelope, absolutely free. Address him at Buffalo, N. Y.

The Electrical World for 1907

The new METALLIC FILAMENT LAMPS, now entering the commercial stage, will work a radical revolution in the field of electric lighting, promising eventually to benefit vastly the electric lighting industry through enormous extensions of the use of electric current, and by relegating gas finally into the rear as a competitor. The problem that will accompany the general introduction of the new types of lamps will be of the highest importance to all in engaged in lighting, and all these will be considered in their minutest detail in the columns of the Electrical World. This journal has during the past year followed more closely than any contemporary in the world every stage of the development of the metallic filament lamp, and in the coming year, while reporting every stage of further development, it will carefully consider all the engineering and commercial questions accompanying the introduction of this extraordinary efficient source of light. This feature alone will render the journal indispensable to the central station staff and to the isolated plant engineer. The older forms of electric light will be brought strongly into compensation in the industrial domain of electricity with the Flaming Arc and the vacuum light thus promising to render '07 one of the most interesting and active in the entire history of electric lighting.
